

TRISTAN BIELBY

AI Software Engineering Student

226-349-9071 | Wyoming, ON | tristan.bielby@gmail.com | [Tristan Bielby | LinkedIn](#) | [NotTribby \(Tristan Bielby\)](#)

OBJECTIVE

Second-year AI Software Engineering Technology student at Centennial College, with hands-on experience in Python, SQL, and full-stack development. Seeking a Machine Learning Engineer or Data Science co-op for Fall 2026.

TECHNICAL SKILLS

Languages: Python, SQL, HTML, CSS, JavaScript (basic)

Libraries & Frameworks: Pandas, Matplotlib, Flask, scikit-learn

APIs & Tools: REST APIs, Git, GitHub, VS Code, Claude

Operating Systems: Windows, Linux

Core Skills: Problem Solving, Data Analysis, Prompt Engineering, Debugging, Self-Directed Learning

PROJECTS

Serie A Match Predictor | Python, scikit-learn, Pandas

- Built a Random Forest model to predict Serie A match outcomes (home win / draw / away win) from engineered team-performance features
- Collected and cleaned multi-season match data, deriving features like win rates and average goals scored and conceded
- Evaluated model performance on held-out test data and benchmarked against a majority-class baseline to measure real predictive value

NVDA Stock Analysis | Python, SQL, Flask

- Engineered an end-to-end data pipeline pulling live Nvidia market data from the Alpha Vantage API, processing it with Python and Pandas
- Modeled and queried the dataset in a SQLite database using SQL, generating price visualizations with Matplotlib
- Built a Flask web application to serve the analysis, with version control managed across multiple machines via Git and GitHub

EDUCATION

CENTENNIAL COLLEGE

AI Software Engineering Technology (3-year program, Online) | 2025 – Present

- Earned a 3.8 GPA in Semester 1 and a 3.9 GPA in Semester 2
- Relevant coursework: Programming Fundamentals (Python), Web Interface Design (HTML, CSS), Software Engineering Fundamentals, Database Concepts (SQL), Linux Operating Systems

WORK EXPERIENCE

FOODLAND, ONTARIO

Grocery Clerk / Stock Associate | July 2023 – Present

- Entered and verified product data for accuracy during stocking
- Maintained inventory organization in a fast-paced retail environment
